

Yuvraj Singh

BACKEND DEVELOPER · ASP.NET Core · Java · Node.js · SQL · Azure

yuvrajch1503@gmail.com · +91 8445043370 · Modinagar, Uttar Pradesh, India

[Portfolio](#) · [LinkedIn](#) · [GitHub](#) · [LeetCode](#) · [GeeksforGeeks](#)

SUMMARY

Backend-focused B.Tech CSE (AI & ML) student (2027, CGPA 8.32) who designs and ships REST APIs end to end. Built and deployed a live licence-management system on Azure App Service using ASP.NET Core and Azure SQL, implemented role-based access control across two live deployments, and solved 580+ DSA problems. Seeking a backend internship owning API design, relational data modelling and integrations.

Availability Immediately, for a 3-month remote internship. Personal laptop and stable high-speed broadband in place.

TECHNICAL SKILLS

Languages C#, Java, Python, JavaScript (ES6+), TypeScript, SQL

Backend & APIs ASP.NET Core, Node.js, Express.js, REST API design, HTTP semantics & status codes, request validation, structured error handling, JWT auth, role-based access control (RBAC), row-level security

Databases Azure SQL, SQL Server, PostgreSQL, MySQL, MongoDB · schema design, normalisation, joins, aggregations, foreign keys, indexing, transactions & ACID

Cloud & Deployment Azure App Service, Git-based continuous deployment, Vercel, environment-based configuration & secrets management, Linux CLI

Core CS DSA — arrays, strings, linked lists, stacks, queues, trees, graphs, hashing, recursion, sorting & searching, dynamic programming · OOP, DBMS, Operating Systems, Computer Networks

Frontend & Tooling React, TypeScript, Tailwind CSS, HTML5, CSS3, responsive design · Git, GitHub, Postman, npm

PROJECTS

Licentra — Software Licence Management System [live demo](#)

07/2026

ASP.NET Core · C# · Azure SQL Database · Azure App Service (Central India)

- Built a licence-management platform where HR and admin users assign software licences to employees and revoke them on role change or exit, replacing manual spreadsheet tracking
- Designed the Azure SQL schema across employees, software, vendors and licence assignments, modelling the assign-and-revoke lifecycle so seat counts and licence spend stay accurate
- Implemented role-based access control separating HR, admin and employee permissions, plus admin-only vendor management with per-software pricing
- Deployed to Azure App Service via Git-based continuous deployment, keeping connection strings in platform configuration rather than source control

Golf Charity Subscription Platform [live demo](#)

03/2026

React · TypeScript · Tailwind CSS · Supabase (PostgreSQL, Auth, Realtime) · Vercel

- Built and deployed a full-stack subscription platform where members track performance and enter monthly prize draws, with separate member and admin experiences
- Modelled the PostgreSQL schema across users, subscriptions, charities, prize draws and results, using foreign keys and normalisation to keep draw history auditable
- Implemented JWT authentication and RBAC, enforcing member-versus-admin permissions with row-level security policies at the database layer rather than in the UI

AI Voice Detection API

11/2025

Python · scikit-learn · REST

- Built a REST API that accepts audio uploads and returns a real-versus-synthetic voice prediction, with routing, service logic and model inference kept in separate layers
- Designed endpoints around correct HTTP semantics — upload validation, meaningful status codes, a consistent JSON error shape — and benchmarked accuracy and latency across datasets

EDUCATION

B.Tech, CSE (AI & ML) Raj Kumar Goel Institute of Technology, Ghaziabad · CGPA 8.32 / 10

2023 – 2027

LEADERSHIP & EXPERIENCE

President — Nebula Society Raj Kumar Goel Institute of Technology

11/2024 – Present

- Lead a 30+ member technical society, owning delegation, deadlines and delivery across concurrent workstreams
- Organised structured technical events for 100+ participants, coordinating logistics, speakers and sub-teams end to end
- Mentor junior members on programming fundamentals, reviewing their work and unblocking them directly

ACHIEVEMENTS & CERTIFICATIONS

580+ DSA problems solved on LeetCode, GeeksforGeeks & CodeChef · Finalist, GUVI × HCL AI Buildathon · Qualifier, Smart India Hackathon 2025

Certifications NPTEL — Java Programming, AI Concepts & Techniques, Python & DSA (2024–25) · LetsUpgrade — Java Bootcamp (2023)
